

Patient Intake Texting

Every pipeline stage, which ones send a text message, and the exact wording the patient receives.

Generated 27 July 2026 · Verified against live Monday.com boards and deployed backend

19

Total stages across
4 Monday boards

8

Intake stages that
send a text

11

Stages that are
silent by design

1

Subscriber text
(outside intake)

How a text gets sent

1 · TRIGGER

A coordinator changes the **Stage Advancer** column in Monday (or a new item is created).

›

2 · WEBHOOK

Monday calls the portal backend on a secret URL. Only the Stage Advancer column is watched.

›

3 · GATE

Backend sends only if the stage is **patient-visible** and **tier 1 or 2**. Tier 3 stays internal.

›

4 · SEND

RingCentral SMS goes out, with the patient's personal portal link appended.

Every intake text ends with the same tracking line

The patient's private portal link is appended automatically to all Phase 0–3 messages: **Track your progress:**

<https://medicallymodern.com/portal?p={patient UID}> — the UID is a random identifier stored on the Monday item, so the link is unguessable and unique per patient. The Phase 4 subscriber text is the one exception; it carries its own bookmark link instead.

[TEST] Demo Patient — CEO Walkthrough

MONDAY ITEM ID	BOARD	CURRENT STAGE
12637989471	Medical Evaluation	1B · Send Request
PHONE (FICTIONAL)	DATE OF INTAKE	
+1 555-010-0042	2026-07-27	

PATIENT PORTAL LINK · LIVE AND VERIFIED

<https://medicallymodern.com/portal?p=1db0221f-20c9-48a9-8715-6cdfee4e67a9>

Texting this link to yourself is the strongest part of the demo. iMessage renders a live preview card that reads "Demo — Working With Your Doctor · Step 2 of 9", generated on the fly from the patient's current stage. Opening it shows the progress tracker.

The phone number is in the 555-01xx reserved fictional range, so no real handset is ever reached during the demo. The name starts with [TEST] , which is the flag the backend uses to permit sending while real-patient texting is switched off. To make texts actually land on a phone during the demo, swap in your own mobile number on the Monday item.

The UID is assigned by the system, not by hand. When the item was created the backend generated this identifier and wrote it back to the Monday item automatically. Anything typed into the Patient UID column beforehand is overwritten — so always read the link's UID off the Monday item after creating it.

CODE	TRIGGER IN MONDAY	SHOWN TO PATIENT AS	TEXT?	MESSAGE SENT
0B	New item created create_item webhook	Referral Received	TEXT SENT	PATIENT RECEIVES We've received your referral and are getting started on your case. We'll keep you updated as we work through the process. Track your progress: https://medicallymodern.com/portal?p=...

Phase 1 — Medical evaluation

STAGE ADVANCER COLUMN

CODE	STAGE ADVANCER VALUE	SHOWN TO PATIENT AS	TEXT?	MESSAGE SENT
1A	Evaluate MN	Medical Review In Progress	SILENT	Internal stage — hidden from the portal, no message defined.
1B	Send Request	Working With Your Doctor	TEXT SENT	PATIENT RECEIVES We're coordinating with your doctor's office to gather the medical documentation needed for your equipment. Track your progress: https://medicallymodern.com/portal?p=...
1C	Confirm Receipt	Confirming Doctor Received	SILENT	Internal stage — hidden from the portal, no message defined.
1D	Chase Clinicals	Awaiting Medical Records	TEXT SENT	PATIENT RECEIVES We're actively following up with your doctor's office to obtain your medical records. This step can sometimes take a few days. Track your progress: https://medicallymodern.com/portal?p=...
1E	Completed	Medical Review Complete	TEXT SENT	PATIENT RECEIVES Great news — your medical records have been reviewed and approved. We're now moving to the insurance verification step. Track your progress: https://medicallymodern.com/portal?p=...
—	Stuck	Under Review	SILENT	Deliberately silent — the patient is never told they are stuck.

Phase 2 — Insurance STAGE ADVANCER COLUMN

CODE	STAGE ADVANCER VALUE	SHOWN TO PATIENT AS	TEXT?	MESSAGE SENT
2A	Benefits / SoS	Verifying Your Benefits	SILENT	Internal stage — hidden from the portal, no message defined.
2B	Submit Auth.	Submitting Authorization	SILENT	Internal stage — hidden from the portal, no message defined.
2C	Auth. Outstanding	Authorization Pending	TEXT SENT	PATIENT RECEIVES Your prior authorization has been submitted to your insurance company. We're waiting on their decision — this typically takes 5–10 business days. Track your progress: https://medicallymodern.com/portal?p=...
2D	Auth Denied	Additional Info Requested	TEXT SENT	PATIENT RECEIVES Your insurance has requested additional information before approving your equipment. Our team is working on next steps and will be in touch. Track your progress: https://medicallymodern.com/portal?p=...
2E	Complete	Insurance Approved	TEXT SENT	PATIENT RECEIVES Your insurance has approved your equipment. We're almost there! Track your progress: https://medicallymodern.com/portal?p=...
—	Stuck / Don't Proceed	Under Review	SILENT	Deliberately silent — the patient is never told they are stuck.
—	DVS	Not mapped	GAP	This stage exists on the Insurance board but has no entry in the portal's stage map. Moving a patient here sends no text and leaves their portal showing the previous stage. See note 3 overleaf.

Phase 3 — Welcome call

STAGE ADVANCER COLUMN

CODE	STAGE ADVANCER VALUE	SHOWN TO PATIENT AS	TEXT?	MESSAGE SENT
3A	Welcome Call	Scheduling Your Welcome Call	SILENT	Appears on the patient's portal, but no text is sent — the message body is empty. See note 4 overleaf.
3B	Review Profile	Final Profile Confirmation	SILENT	Internal stage — hidden from the portal, no message defined.
3C	Completed	You're All Set!	TEXT SENT	PATIENT RECEIVES You're all set! Your equipment order is queued. Welcome to Medically Modern! Track your progress: https://medicallymodern.com/portal?p=...
—	Stuck / Don't Proceed	Under Review	SILENT	Deliberately silent — the patient is never told they are stuck.

Phase 4 — Subscriber welcome

SUBSCRIPTION BOARD · SEPARATE FROM INTAKE

CODE	TRIGGER IN MONDAY	SHOWN TO PATIENT AS	TEXT?	MESSAGE SENT
4A	New item created create_item webhook	Welcome to Your Portal	TEXT SENT	PATIENT RECEIVES Welcome to your Medically Modern patient portal! You can now log in to manage your account, update your information, and track the status of your orders. Bookmark this link for easy access: https://medically-modern.github.io/mm-subscriber-portal/ If you have any questions, our team is here to help. No progress-tracking link – this message carries its own bookmark URL.

What to know before the demo

1 • Real patients are not being texted right now

The backend blocks every send unless the patient's name begins with `[TEST]`. Real patients are skipped with a logged reason until the `PRODUCTION_SMS_ENABLED` switch is turned on. This is the intended safety catch for development — but it does mean the system is currently silent for live patients, and flipping that switch is a deliberate go-live decision.

2 • The "don't nag the patient" timers are switched off

Two stages were designed to hold back: **1B** should only text if 24 hours have passed, and **1D** only after 3 days. That timing logic is currently bypassed in the code, so a text goes out on every advancement into those stages. If a coordinator moves a patient back and forth, the patient gets a duplicate text each time.

3 • The Insurance board has a stage the portal doesn't know about

The **DVS** stage exists in Monday but is missing from the portal's stage map. A patient parked there gets no text and their portal keeps showing whatever stage they were in previously, so the portal quietly goes stale rather than showing an error.

4 • "Scheduling Your Welcome Call" shows on the portal but sends nothing

Stage **3A** is visible to the patient in the portal, but its message body is empty and it is classified as internal-tier, so no text is sent. The patient sees the stage change online without being notified.

5 • Dragging a patient into "Completed" does not send the final text

The **3C • You're All Set!** text only fires when the **Stage Advancer** column is set to *Completed*. Moving the item into the Completed group by dragging it does nothing — no webhook is registered for group moves. Worth calling out to coordinators, since dragging is the more natural gesture.

6 • Coverage at a glance

Of the 19 stages, 8 intake stages text the patient and 11 stay silent. The silence is mostly deliberate — internal review steps and "stuck" states are hidden on purpose so patients aren't alarmed. The two unintentional gaps are DVS (note 3) and 3A (note 4).
